

Fail Safe Tester High Current Relay Card (HCRC)

Features

The High Current Relay Card is equipped with 4 channels. One channel of a Standard Relay Card gives the possibility to connect input signals and output signals as follows.

- Connect / disconnect input and output of one channel.
- Connect any input with any output located on the same card as well as on other relay cards.

Technical Data

Maximum I/O voltage	AC/DC < 50V
Maximum I /O oad (resistive)	DC: < 28 V : 30A, > 50 V : 15A; AC: < 50 V : 30 A
Channels	4
Operate time	15 ms
Release time	10 ms
Maximum length of connected wires:	<3 m, for EMV reasons
Size	4 U, requires 2 Slots
Connectors (desktop case)	MOLEX MINIFIT 4x

Order Information

Article Description	High Current Relay Card, for standard front panel	High Current Relay Card, for custom front panel
Order Number	FST-HCRC-SFP	FST-HCRC-CFP
